

Installation guide

PRE-PROGRAM ASSIGNMENTS TO BE COMPLETED!!

PLEASE READ COMPLETELY AND FOLLOW EACH ACTIVITY CAREFULLY

If you follow our guidelines sequentially, you will be successful with pre-program assignments in less than 30 minutes without anyone's assistance.

If you have issues with any of these activities, our video will help you out to carry on your installation process.

If you are not comfortable with the video, you can also read the document at <https://tinyurl.com/SeleniumSWInstall> before you post your doubts in the WhatsApp sub group

1) List of Software Installations and downloads to be done:

- ✓ Java JDK (Installation required)
- ✓ Eclipse (Just Download and Run)
- ✓ Creating Maven Project and Dependencies in Eclipse

2) Resources to Support Software Installations:

1. Download the required software available at [**https://tinyurl.com/SeleniumSoftwares**](https://tinyurl.com/SeleniumSoftwares) (Select Software folder and download to your local, Download only the required SW)

2. Please go through the link for installation support in document form.

[**https://tinyurl.com/SeleniumSWInstall**](https://tinyurl.com/SeleniumSWInstall)

3. Please go through the link for installation support in audio-video form.

[**https://tinyurl.com/SeleniumInstallVideo**](https://tinyurl.com/SeleniumInstallVideo)

3) Important Note:

1. Do not download the software(s) from any other sources as we have bundled the software with the required plug-ins.
2. You need a decent internet connection during the installation. Please ensure your internet connection is uninterrupted.
3. Watch the video once, before starting to install and refer to the video and Installation Document, when needed.
4. If you still face any issues during installation, please post the issue and the corresponding Screenshot in your respective groups in Whatsapp. Our Mentors will help you resolve the issue.
5. Recommend using <https://web.whatsapp.com> for easy use of WhatsApp on your laptop/desktop. Please refer <http://tinyurl.com/SetupWebWhatsApp>
6. Please complete the installations as early as possible.

Final part of the installation

Ruto-Chrome

- Go to the Google Chrome browser.
- Navigate to Link: <http://tiny.cc/RutoChrome>
- Click Add to Chrome

Note: In the following pop-up, click add an extension

Ruto-Firefox

- Go to the Mozilla Firefox browser.
- Navigate to Link: <http://tiny.cc/RutoFirefox>
- Click Add to Firefox

Note: In the following pop-up, click add.

If you do not have a Firefox browser, please do install it.

Regards,

Testleaf Tech Team

Thank
you!
